Code protection

Easy to install

PINGuard™
by Codelocks

PINGuard™

by Codelocks

PINGuard™ by Codelocks is a new range of weather shields providing additional security whilst protecting your Codelocks mechanical and electronic locks from adverse weather conditions.

The weather shields are flexible, high grade polymer that fit behind the lock, improving the gasket seal and preventing water ingress making them an ideal external accessory to your Codelocks digital standalone lock.

PROTECT YOUR PIN

Keep prying eyes away from your entry code! Add to external and internal doors where the PIN needs protecting from view.

PROTECT YOUR LOCK

PINGuard™ by Codelocks significantly reduces the effects of water ingress and sub-zero temperatures. The added weather protection will extend the life of your lock. Protect the finish, the keypad and overall appearance of your Codelocks product. Small and medium PINGuard™ by Codelocks available, suitable for external applications; gates, sheds, out buildings, work sites etc.
